NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 — Basis of Presentation and Significant Accounting Policies

Nature of operations and basis of consolidation — People's Utah Bancorp, Inc. ("PUB" or the "Company") is a Utah corporation headquartered in American Fork, Utah. The Company operates all business activities through its wholly-owned banking subsidiary, People's Intermountain Bank ("PIB" or the "Bank"), which was organized in 1913. The Bank is a Utah state chartered bank. The Bank operates under the jurisdiction of the Utah Department of Financial Institutions, and its deposits are insured by the Federal Deposit Insurance Corporation ("FDIC"). The Bank is not a member of the Federal Reserve System; however, PUB is operated as a bank holding company under the Federal Bank Holding Company Act of 1956 and is the sole shareholder of the Bank. Both PUB and the Bank are subject to periodic examination by applicable federal and state regulatory agencies and file periodic reports and other information with the agencies. The Company considers the Bank to be its sole operating segment.

PIB is a community bank that provides highly personalized retail and commercial banking products and services to small and medium sized businesses and to individuals. Products and services are offered primarily through 26 retail branch locations throughout Utah and southern Idaho. PIB has three banking divisions, Bank of American Fork, Lewiston State Bank, and People's Town & Country Bank; and a mortgage division, People's Intermountain Bank Mortgage. The Bank offers a full range of short-term to long-term commercial, personal and mortgage loans. Commercial loans include both secured and unsecured loans for working capital (including inventory and accounts receivable), business expansion (including acquisition of real estate and improvements), and purchase of equipment and machinery. Consumer loans include secured and unsecured loans to finance automobiles, home improvements, and personal investments. The Bank also offers mortgage loans secured by personal residences. The Bank offers a full range of deposit services typically available in most financial institutions, including checking accounts, savings accounts, and time deposits. The Bank solicits these accounts from individuals, businesses, associations and organizations, and governmental entities.

The accompanying unaudited interim consolidated financial statements include the accounts of the Company together with its subsidiary Bank. All intercompany transactions and balances have been eliminated.

These unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X as promulgated by the Securities and Exchange Commission (SEC). In preparing these financial statements, the Company has evaluated events and transactions subsequent to June 30, 2019, for potential recognition or disclosure. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of the financial position and results of operations for the periods presented have been included. Certain information and disclosures normally included in annual financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to the rules and regulations of the SEC and the accounting standards for interim financial statements. Certain reclassifications have been made to the 2018 Consolidated Financial Statements and/or schedules to conform to the 2019 presentation. These reclassifications may have affected certain ratios for the prior periods. The effect of these reclassifications is considered immaterial.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect amounts reported in the financial statements. Various elements of the Company's accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. In particular, management has identified several accounting policies that, due to the judgments, estimates and assumptions inherent in those policies, are significant to an understanding of the Company's financial statements. These policies relate to (i) the methodology for the recognition of interest income, (ii) determination of the provision and allowance for loan losses, (iii) the valuation of financial assets and liabilities recorded at fair value, including other-than-temporary impairment (OTTI) losses, (iv) the valuation of intangibles, such as goodwill, core deposit intangibles (CDI) and mortgage servicing rights, (v) the valuation of real estate held for sale, (vi) the valuation of assets and liabilities acquired in business combinations and subsequent recognition of related income and expense, and (vii) the valuation or recognition of deferred tax assets and liabilities. These policies and judgments, estimates and assumptions are described in greater detail in subsequent notes to the Consolidated Financial Statements and Management's Discussion and Analysis of Financial Condition and Results of Operations (Critical Accounting Policies) in our Annual Report on Form 10-K for the year ended December 31, 2018 filed with the SEC (2018 Form 10-K). There have been no significant changes in our application of these accounting policies during the first six months of 2019, except as described later in Note 1.

The information included in this Form 10-Q should be read in conjunction with our 2018 Form 10-K. Interim results are not necessarily indicative of results for a full year or any other interim period.

Note 1 — Basis of Presentation and Significant Accounting Policies – Continued

Earnings per share — Basic earnings per common share represents income available to common shareholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect additional common shares that would have been outstanding if dilutive potential common shares had been issued. Potential common shares include shares that may be issued by the Company for outstanding stock options determined using the treasury stock method and for all outstanding restricted stock units (“RSU”).

Reclassifications — Certain amounts in the prior period’s financial statements have been reclassified to conform to the current period’s presentation.

Impact of Recent Authoritative Accounting Guidance —The Accounting Standards Codification™ (“ASC”) is the Financial Accounting Standards Board’s (“FASB”) officially recognized source of authoritative GAAP applicable to all public and non-public non-governmental entities. Periodically, the FASB will issue Accounting Standard Updates (“ASU”) to its ASC. Rules and interpretive releases of the SEC under the authority of the federal securities laws are also sources of authoritative GAAP for us as an SEC registrant. All other accounting literature is non-authoritative.

In August 2018, FASB issued ASU 2018-15, *Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract*. The amendments in this ASU broaden the scope of ASC Subtopic 350-40 to include costs incurred to implement a hosting arrangement that is a service contract. The amendments align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The costs are capitalized or expensed depending on the nature of the costs and the project stage during which they are incurred, consistent with the accounting for costs for internal-use software. The amendments in this ASU result in consistent capitalization of implementation costs of a hosting arrangement that is a service contract and implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The accounting for the service element of a hosting arrangement that is a service contract is not affected by the amendments in this ASU. This ASU is effective for fiscal years beginning after December 15, 2019 and interim periods within those fiscal years. The amendments in this ASU should be applied either retrospectively or prospectively to all implementation costs incurred after the date of adoption. Adoption of ASU 2018-15 is not expected to have a material impact on the Company’s Consolidated Financial Statements.

In August 2018, FASB issued ASU 2018-13, *Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement*. The amendments in this ASU modify the disclosure requirements on fair value measurements in Topic 820, *Fair Value Measurement*. The ASU removes, modifies and adds disclosure requirements in Topic 820. The following disclosure requirements were removed: (1) the amount and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy; (2) the policy for timing of transfers between levels; and (3) the valuation processes for Level 3 fair value measurements. This ASU modified the disclosure requirements to require that the measurement uncertainty disclosure communicates information about the uncertainty in measurement as of the reporting date. The following disclosure requirements were added: (1) changes in unrealized gains and losses for the period included in other comprehensive income for the recurring Level 3 fair value measurements held at the end of the reporting period; and (2) the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements. The amendments in this ASU are effective for all entities for fiscal years; and interim periods within those fiscal years, beginning after December 15, 2019. An entity is permitted to early adopt any removed or modified disclosures upon issuance of this ASU and delay adoption of the additional disclosures until their effective date. Adoption of ASU 2018-13 is not expected to have a material impact on the Company’s Consolidated Financial Statements.

In June 2016, the FASB issued ASU No. 2016-13, “*Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*.” The ASU significantly changes the impairment model for most financial assets that are measured at amortized cost and certain other instruments from an incurred loss model to an expected loss model. This ASU is effective for interim and annual reporting periods beginning after December 15, 2019. Early adoption is permitted for all entities beginning after December 15, 2018, including interim periods within those fiscal years. The Company is in the process of identifying required changes to the loan loss estimation models and processes and evaluating the impact of this new guidance. Once adopted, we expect our allowance for loan losses to increase; however, until our evaluation is complete, the magnitude of the increase is not known.

In February 2016, FASB issued ASU No. 2016-02, *Leases (Topic 842)*. The amendments in this ASU require lessees to recognize the following for all leases (with the exception of short-term) at the commencement date: a lease liability, which is a lessee’s obligation to make lease payments arising from a lease, measured on a discounted basis; and a right-of-use asset, which is an asset that represents the lessee’s right to use, or control the use of, a specified asset for the lease term. The amendments in this ASU leave lessor accounting largely unchanged, although certain targeted improvements were made to align lessor accounting with the lessee accounting model. This ASU simplifies the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities.

Note 1 — Basis of Presentation and Significant Accounting Policies – Continued

Lessees will no longer be provided with a source of off-balance sheet financing. ASU No. 2016-02 is effective for interim and annual reporting periods beginning after December 15, 2018, and entities are required to use a modified retrospective approach for leases. The Company adopted the new guidance effective January 1, 2019. The Company elected the transition option provided in ASU No. 2018-11 and applied the modified retrospective approach. The Company also elected certain relief options for practical expedients: the option to not separate lease and non-lease components and instead to account for them as a single lease component; and the option to not recognize right-of-use assets and lease liabilities that arise from short-term leases (i.e. leases terms of twelve months or less). The Company has eight real property leases under non-cancelable operating leases, three of which will be subject to this ASU that will result in the recognition of right-of-use assets and lease liabilities. All of the Company's equipment is owned or on short-term leases. The Company compiled a complete inventory of arrangements containing leases and analyzed the lease data necessary to meet the new requirements. In connection with the adoption of this ASU, as of January 1, 2019, the Company recorded a \$2.2 million right of use asset and a \$2.2 million lease liability on its Consolidated Balance Sheets.

In August 2017, the FASB issued ASU no. 2017-12, Targeted Improvements to Accounting for Hedging Activities. The primary focus of the amendment is to simplify hedge accounting and make the results of hedge transactions in the financial statements easier to understand. An ancillary result of the amendment is that an entity may make a one-time transfer of certain securities from the held to maturity classification to the available for sale classification. The amendment is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. As allowed under this accounting pronouncement, the Company has elected to make a one-time transfer of \$64.6 million of held to maturity securities to the available for sale classification as of January 1, 2019, and has recorded an unrecognized loss of \$19,000, net of taxes, to other comprehensive income.

After ten years	163,646	164,470
	<u>\$ 334,248</u>	<u>\$ 334,762</u>

Actual maturities may differ from contractual maturities because issuers may have the right to call obligations with or without penalties and other securities may experience pre-payments.

As of June 30, 2019, the Company held 218 available for sale investment securities with fair value less than amortized cost compared to 201 at December 31, 2018. In addition, the Company had no held to maturity securities with fair values less than amortized cost at June 30, 2019, and held 122 held to maturity securities with fair values less than amortized cost at December 31, 2018. Management evaluated these investment securities and determined that the decline in value is temporary and related to the change in market interest rates since purchase. The decline in value is not related to any company or industry specific event. The Company anticipates full recovery of the amortized cost with respect to these securities at maturity, or sooner, in the event of a more favorable market interest rate environment.

Note 2 — Investment Securities – continued

The Company had no sales of available for sale securities during the six months ended June 30, 2019 compared to \$500,000 during the six months ended June 30, 2018, which resulted in a net gain of \$335,000. There were no available for sale securities in a nonaccrual status at June 30, 2019 or December 31, 2018.

The Company had no sales of held to maturity securities during the six months ended June 30, 2019 and 2018, respectively. The Company had no held to maturity securities in a nonaccrual status at June 30, 2019 or December 31, 2018.

As of June 30, 2019, and December 31, 2018, there are \$1.74 million and \$2.24 million, respectively, in Purchased Credit Impaired (“PCI”) loans that are not performing to the original contractual terms. Including these PCI loans, total non-accrual loans are \$5.0 million and \$4.5 million at June 30, 2019, and December 31, 2018.

Note 3 — Loans and Allowance for Loan Losses – Continued

Troubled debt restructured (“TDR”) loans are summarized as follows:

<i>(Dollars in thousands)</i>	June 30, 2019	December 31, 2018
Accruing troubled debt restructured loans	\$ 19,336	\$ 5,912
Non-accrual troubled debt restructured loans	1,503	1,599
Total troubled debt restructured loans	\$ 20,839	\$ 7,511

There were no PCI TDR non-performing loans as of June 30, 2019 and December 31, 2018.

A restructured loan is considered a troubled debt restructured loan (“TDR”), if the Company, for economic or legal reasons related to the debtor’s financial difficulties, grants a concession in terms or a below-market interest rate to the debtor that it would not otherwise consider. Each TDR loan is separately negotiated with the borrower and includes terms and conditions that reflect the borrower’s prospective ability to service the debt as modified.

The following tables present TDRs that occurred during the periods presented and the TDRs for which the payment default occurred within twelve months of the restructure date. A default on a restructured loan results in a transfer to nonaccrual status, a charge-off or a combination of both.

(1) Since most loans were already considered classified and/or on non-accrual status prior to restructuring, the modifications did not have a material effect on the Company’s determination of the allowance for loan losses.

(2) Generally, these modifications do not fit into one separate type, such as rate, term, amount, interest-only or payment, but instead are a combination of multiple types of modifications; therefore, they are disclosed in aggregate.

Credit Quality Indicators:

In addition to past due and non-accrual criteria, the Company also analyzes loans using a loan grading system. Performance-based grading follows the Company's definitions of Pass, Special Mention, Substandard and Doubtful, which are consistent with published definitions of regulatory risk classifications.

Definitions of Pass, Special Mention, Substandard, and Doubtful are summarized as follows:

Pass: A Pass asset is higher quality and does not fit any of the other categories described below. The likelihood of loss is considered remote.

Special Mention: A Special Mention asset has potential weaknesses that may be temporary or, if left uncorrected, may result in a loss. While concerns exist, the Company is currently protected and loss is considered unlikely and not imminent.

Substandard: A Substandard asset is inadequately protected by the current sound net worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified have well defined weaknesses and are characterized by the distinct possibility that the Company may sustain some loss if deficiencies are not corrected.

Doubtful: A Doubtful asset has all the weaknesses inherent in a Substandard asset with the added characteristics that the weaknesses make collection or liquidation in full highly questionable.

Note 3 — Loans and Allowance for Loan Losses – Continued

For Consumer loans, the Company generally assigns internal risk grades similar to those described above based on payment performance.

Outstanding loan balances (accruing and non-accruing) categorized by these credit quality indicators are summarized as follows:

Purchased credit-impaired loans and purchased non-credit-impaired loans. Purchased loans, including loans acquired in business combinations, are recorded at their fair value at the acquisition date. Credit discounts are included in the determination of fair value; therefore, an allowance for loan and lease losses is not recorded at the acquisition date. Acquired loans are evaluated upon acquisition and classified as either purchased credit-impaired (PCI) or purchased non-credit-impaired. PCI loans reflect credit deterioration since origination such that it is probable at acquisition that the Company will be unable to collect all contractually required payments. The outstanding contractual unpaid principal balance of PCI loans, excluding acquisition accounting adjustments, was \$7.0 million at June 30, 2019 and \$7.7 million at December 31, 2018. The carrying balance of PCI loans was \$4.1 million at June 30, 2019 and \$4.7 million at December 31, 2018.

The following table presents the changes in the accretable yield for PCI loans for the six months ended June 30, 2019, and 2018:

<i>(Dollars in thousands)</i>	Six Months Ended

Note 3 — Loans and Allowance for Loan Losses – Continued

As of June 30, 2019 and December 31, 2018, the non-accretable difference between the contractually required payments and cash flows expected to be collected were \$2.8 million and \$2.9 million, respectively.

Loans and Deposits to affiliates — The Company has entered into loan transactions with certain directors, affiliated companies and executive committee members (“affiliates”). Such transactions were made in the ordinary course of business on substantially the same terms and conditions, including interest rates and collateral, as those prevailing at the same time for comparable transactions with other customers, and did not, in the opinion of management, involve more than normal credit risk or present other unfavorable features. Total outstanding loans with affiliates were approximately \$3.5 million and \$5.6 million as of June 30, 2019, and December 31, 2018, respectively. Available lines of credit for loans and credit cards to affiliates were approximately \$319,000 and \$951,000 as of June 30, 2019, and December 31, 2018, respectively. Deposits from affiliates were \$5.2 million and \$8.8 million as of June 30, 2019 and December 31, 2018, respectively.

Note 4 — Commitments and Contingencies

Litigation contingencies — The Company is involved in various claims, legal actions and complaints which arise in the ordinary course of business. In the Company’s opinion, all such matters are adequately covered by insurance, are without merit or are of such kind, or involve such amounts, that unfavorable disposition would not have a material adverse effect on the financial condition or results of operations of the Company.

Commitments to extend credit — In the normal course of business, the Company has outstanding commitments and contingent liabilities, such as commitments to extend credit and unused credit card lines, which are not included in the accompanying consolidated financial statements. The Company’s exposure to credit loss in the event of non-performance by other parties to the financial instruments for commitments to extend credit and unused credit card lines is represented by the contractual or notional amount of those instruments. The Company uses the same credit policies in making such commitments as it does for instruments that are included in the consolidated balance sheets.

Contractual amounts of off-balance sheet financial instruments were as follows:

<i>(Dollars in thousands)</i>	June 30, 2019	December 31, 2018
Commitments to extend credit, including unsecured commitments of \$18,143 and \$16,304 as of June 30, 2019 and December 31, 2018, respectively	\$ 572,916	\$ 577,612
Stand-by letters of credit and bond commitments, including unsecured commitments of \$578 and \$730 as of June 30, 2019 and December 31, 2018, respectively	26,528	22,979
Unused credit card lines, all unsecured	25,409	24,885

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments to extend credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Company, is based on management’s credit evaluation of the customer.

Unused credit card lines are commitments for possible future extensions of credit to existing customers. These lines of credit are uncollateralized and usually do not contain a specified maturity date and may not be drawn upon to the total extent to which the Company is committed.

Note 5 — Fair Value

The Company measures and discloses certain assets and liabilities at fair value. The standard requires us to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. These two types of inputs create the following fair value hierarchy:

- Level 1 – Quoted prices in active markets for identical instruments.
- Level 2 – Observable inputs other than Level 1 including quoted prices in active markets for similar instruments, quoted prices in less active markets for identical or similar instruments, or other observable inputs that can be corroborated by observable market data.
- Level 3 – Unobservable inputs supported by little or no market activity for financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

The estimated fair value amounts of financial instruments have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize at a future date. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. In addition, reasonable comparability between financial institutions may not be likely due to the wide range of permitted valuation techniques and numerous estimates that must be made given the absence of active secondary markets for many of the financial instruments. This lack of uniform valuation methodologies also introduces a greater degree of subjectivity to these estimated fair values.

The following methods were used to estimate the fair value of each class of financial instruments:

Securities: The estimated fair values of investment securities are priced using current active market quotes, if available, which are considered Level 1 measurements. For most of the portfolio, matrix pricing based on the securities' relationship to other benchmark quoted prices is used to establish the fair value. These measurements are considered Level 2. Level 3 measurements were determined using discounted cash flow analyses based on the net present value of each security's projected cash flows using observable market data for similar securities.

Non-marketable securities: The fair value is based upon the redemption value of the stock, which equates to its carrying value.

Loans held for sale: The carrying amount of these items is a reasonable estimate of their fair value.

Loans held for investment: The fair value is estimated by discounting the future cash flows and estimated prepayments using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining term. Some loan types fair value approximated carrying value because of their floating rate or expected maturity characteristics.

Deposits: The carrying amount of deposits with no stated maturity, such as savings and checking accounts, is a reasonable estimate of their fair value. The market value of certificates of deposit is based upon the discounted value of contractual cash flows. The discount rate is determined using the rates currently offered on comparable instruments.

Note 5 — Fair Value - Continued

The following table presents estimated fair values of the Company's financial instruments as of June 30, 2019 and December 31, 2018:

Note 6 — Income Taxes

Income tax expense was \$3.5 million and \$3.3 million for the three months ended June 30, 2019 and 2018, respectively. The Company's effective tax rate for the second quarter of 2019 was 24.1% compared with 23.9% in the second quarter of 2018. The tax rate in the second quarter of 2019 is higher than the same quarter in 2018 due primarily to higher tax benefits related to tax-deductible stock compensation expense in 2018.

Income tax expense was \$6.8 million and \$5.8 million for the six months ended June 30, 2019 and 2018, respectively. The Company's effective tax rate for the six months ended June 30, 2019 was 23.9% compared with 23.1% in the same period a year ago. The tax rate in the six months ended June 30, 2019 is higher than the same period a year ago due primarily to higher tax benefits related to tax-deductible stock compensation expense in 2018.

Note 7 — Regulatory Capital Matters

The consolidated Tier 1 Leverage ratio increased to 12.78% as of June 30, 2019 from 12.27% at December 31, 2018. Federal Reserve Board Regulations require maintenance of certain minimum reserve balances based on certain average deposits, which, as of June 30, 2019 and December 31, 2018, were \$11.9 million and \$2.2 million, respectively. The Company's Board of Directors may declare a cash or stock dividend out of retained earnings provided the regulatory minimum capital ratios are met. The Company plans to maintain capital ratios that meet the well-capitalized standards per the regulations and, therefore, plans to limit dividends to amounts that are appropriate to maintain those well-capitalized regulatory capital ratios.

Note 8 — Incentive Share-Based Plan and Other Employee Benefits

In June 2014, the Board of Directors (“Board”) and shareholders of the Company approved a share-based incentive plan (“the Plan”). The Plan provides for various share-based incentive awards including incentive share-based options, non-qualified share-based options, restricted shares, and stock appreciation rights to be granted to officers, directors and other key employees. The maximum aggregate number of shares that may be issued under the Plan is 800,000 common shares. The share-based awards are granted to participants under the Plan at a price not less than the fair value on the date of grant and for terms of up to ten years. The Plan also allows for granting of share-based awards to directors and consultants who are not employees of the Company.

During the six months ended June 30, 2019, the Company granted 30,941 restricted stock units (“RSU”) at a weighted-average fair value of \$30.08 per unit. The RSU’s generally vest over periods from one to three years. The Company recorded share-based compensation expense of \$381,000 and \$370,000 for the six months ended June 30, 2019 and 2018, respectively. Additionally, the Company did not grant any options for the purchase of common shares during the six months ended June 30, 2019.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion is intended to provide a more comprehensive review of People’s Utah Bancorp’s operating results and financial condition than can be obtained from reading the Unaudited Consolidated Financial Statements alone. The discussion should be read in conjunction with the Unaudited Consolidated Financial Statements and the notes thereto included in “Part I. Item 1. Financial Statements.”

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q may contain certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements reflect our current views and are not historical facts. These statements can generally be identified by use of phrases such as “believe,” “expect,” “will,” “seek,” “should,” “anticipate,” “estimate,” “intend,” “plan,” “target,” “project,” “commit” or other words of similar import. Similarly, statements that describe our future financial condition, results of operations, objectives, strategies, plans, goals or future performance and business are also forward-looking statements. Statements that project future financial conditions, results of operations and shareholder value are not guarantees of performance and many of the factors that will determine these results and values are beyond our ability to control or predict. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. These are forward-looking statements and involve known and unknown risks, uncertainties and other factors, including, but not limited to, those described in the “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” sections in this report and our Annual Report on Form 10-K for the year ended December 31, 2018 (“Form 10-K”), and other parts of this report that could cause our actual results to differ materially from those anticipated in these forward-looking statements. The following is a non-exclusive list of factors which could cause our actual results to differ materially from our forward-looking statements in this prospectus:

- changes in general economic conditions, either nationally or in our local market;
- inflation, interest rates, securities market volatility and monetary fluctuations;
- increases in competitive pressures among financial institutions and businesses offering similar products and services;
- higher defaults on our loan portfolio than we expect;
- changes in management’s estimate of the adequacy of the allowance for loan losses;
- risks associated with our growth and expansion strategy and related costs;
- ability to raise liquidity, either with deposits or other funding sources, to support our growth in assets;
- risks associated with the integration of current and future acquisitions.
- increased lending risks associated with our high concentration of real estate loans;
- ability to successfully grow our business in Utah and neighboring states;
- legislative or regulatory changes or changes in accounting principles, policies or guidelines;
- risks associated with cyber security.
- technological changes;
- regulatory or judicial proceedings; and
- other factors and risks including those described under “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in this report and our Annual Report on Form 10-K for the year ended December 31, 2018.

Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated, expected, projected, intended, committed or believed.

Please take into account that forward-looking statements speak only as of the date of this Form 10-Q. We do not undertake any obligation to release publicly our revisions to such forward-looking statements to reflect events or circumstances after the date of this Form 10-Q.

Overview

People's Utah Bancorp ("PUB") is the holding company for People's Intermountain Bank. People's Intermountain Bank ("Bank" or "PIB") is a full-service community bank providing loans, deposit and cash management services to individuals and businesses. People's Intermountain Bank has 26 branch locations in three banking divisions, Bank of American Fork, Lewiston State Bank, and People's Town & Country Bank; and a mortgage division, People's Intermountain Bank Mortgage. We provide banking services for small to medium sized businesses and to individuals in our primary markets including Utah, Salt Lake, Davis, Cache, and Washington Counties. Our business customers are involved in a variety of industries, including residential and commercial construction and development, manufacturing, distribution and other services. We also provide a broad range of banking services and products to individuals, including residential mortgage lending, personal checking and savings accounts and other consumer banking products, including electronic banking. The Bank has been serving communities in Utah and southern Idaho for more than 100 years.

Our loan growth is the result of mergers and acquisitions as well as organic growth that we believe was generated by our seasoned relationship managers and supporting associates who provide outstanding service and quick responsiveness to our customers. The primary source of funding for our asset growth has been the generation of core deposits, which we raised through acquisitions as well as from our existing branch system.

Our results of operations are largely dependent on net interest income. Net interest income is the difference between interest income we earn on interest earning assets, which are comprised of loans, investment securities and short-term investments and the interest we pay on our interest bearing liabilities, which are primarily deposits, and, to a lesser extent, other borrowings. Management strives to match the re-pricing characteristics of the interest earning assets and interest bearing liabilities to protect net interest income from changes in market interest rates and changes in the shape of the yield curve.

We measure our performance by calculating our net interest margin, return on average assets, and return on average equity. Net interest margin is calculated by dividing net interest income, which is the difference between interest income on interest earning assets and interest expense on interest bearing liabilities, by average interest earning assets. Net interest income is our largest source of revenue. Interest rate fluctuations, as well as changes in the amount and type of earning assets and liabilities, combine to affect net interest income. We also measure our performance by our efficiency ratio, which is calculated by dividing non-interest expense by the sum of net interest income and non-interest income.

Mergers & Acquisitions

Utah Branches from Banner Bank — On October 6, 2017, we completed our acquisition of \$257 million in loans and seven Utah branch locations with \$160 million in low-cost core deposits from Banner Corporation's subsidiary Banner Bank. The Bank paid a deposit premium of \$13.8 million based on average deposits at closing. The seven branch locations in Utah include Salt Lake City, Provo, South Jordan, Woods Cross, Orem, Salem, and Springville. The Woods Cross and Orem branches were consolidated into our existing Bank of American Fork Bountiful and Orem branches, respectively. We are operating these acquired branches under the name of Bank of American Fork, a division of PIB.

Town & Country Bank — On November 13, 2017, we completed the merger of Town & Country Bank located in St. George, Utah, including the acquisition of \$117 million in loans and the assumption of \$124 million in deposits. We consolidated our existing St. George branch and Town & Country's branch into one branch. Under the terms of the merger, each outstanding Town & Country common share converted into the right to receive 0.2917 PUB common shares and \$4.23 per common share in cash, including \$2.0 million of cash held in escrow that is subject to indemnification claims. Town & Country shareholders also received an additional cash distribution of \$1.68 per common share in cash. A total of 466,546 PUB common shares were issued in this transaction. We operate this branch under the name of People's Town & Country Bank, a division of PIB.

Non-GAAP Financial Measures

In addition to financial results presented in accordance with generally accepted accounting principles ("GAAP"), this Management's Discussion & Analysis contains certain non-GAAP financial measures. We have presented these non-GAAP financial measures because we believe that they provide useful and comparative information to assess trends in our core operations and such presentation facilitates the comparison of our financial performance with the performance of our peers and the comparative years presented. We have excluded acquisition related costs, net gains and losses on the sale of certain securities, and the write-down of our deferred income tax assets due to the reduction in the Federal corporate income tax rate to derive non-GAAP financial information related to the company's core operations. The Company believes this non-GAAP financial information is useful in understanding the Company's core financial performance.

However, these non-GAAP financial measures are supplemental and are not a substitute for any analysis based on GAAP. Where applicable, we have also presented comparable earnings information using GAAP financial measures. For a reconciliation of these non-GAAP financial measures, see the tables below. Because not all companies use the same calculations, our presentation may not be comparable to other similarly titled non-GAAP measures as calculated by other companies.

(NG) **Non-GAAP Financial Measures**

In addition to financial results presented in accordance with GAAP, this schedule contains certain non-GAAP financial measures. Management has presented these non-GAAP financial measures because it believes that they provide useful and comparative information to assess trends in core operations and facilitate the comparison of our financial performance with the performance of our peers.

⁽¹⁾ Represents the sum of total shareholders' equity less intangible assets all divided by the sum of total assets less intangible assets. Intangible assets were \$28.9 million, \$29.0 million, \$29.1 million and \$29.3 million at June 30, 2019, March 31, 2019, December 31, 2018, and June 30, 2018, respectively.

⁽²⁾ Net interest margin is defined as net interest income divided by average earning assets.

Results of Operations

Factors that determine the level of net income include the volume of earning assets and interest bearing liabilities, yields earned and rates paid, fee income, non-interest expense, the level of non-performing loans and other non-earning assets, and the amount of non-interest bearing liabilities supporting earning assets. Non-interest income primarily includes service charges and other fees on deposits, and mortgage banking income. Non-interest expense consists primarily of employee compensation and benefits, occupancy, equipment and depreciation expense, and other operating expenses.

Average Balance and Yields. The following tables set forth a summary of average balances with corresponding interest income and interest expense, as well as average yield, cost and net interest margin information for the periods presented. Average balances are derived from daily balances. Average non-accrual loans are derived from quarterly balances and are included as non-interest earning assets for purposes of these tables.

Rate/Volume Analysis. The following table shows the change in interest income and interest expense and the amount of change attributable to variances in volume, rates and the combination of volume and rates based on the relative changes of volume and rates. For purposes of this table, the change in interest due to both volume and rate has been allocated to change due to volume and rate in proportion to the relationship of absolute dollar amounts of change in each.

Net interest income increased \$0.7 million to \$27.7 million for the three months ended June 30, 2019 compared with \$27.0 million for the same period of 2018. The increase is primarily the result of average interest earning assets growing 3.1%, or \$64.8 million, and yields on interest earning assets increasing 8 basis points to 5.68% for the same comparable periods. Higher yields on interest earning assets were primarily the result of yields on loans increasing 23 basis points to 6.57% for the same comparable periods, offset by the percentage of loans to total interest earning assets declining to 79.5% for the second quarter of 2019 compared with 83.2% for the second quarter of 2018.

For the three months ended June 30, 2019, total cost of interest bearing liabilities increased 17 basis points to 0.74% compared with the same period a year ago, and is the result of the cost of interest bearing deposits increasing 34 basis points to 0.74% for the same comparable periods. The Company had no short-term borrowing for the second quarter of 2019 compared with \$128.3 million of short-term borrowings for the second quarter of 2018. The Company expects the increase in cost of interest bearing deposits to remain flat over the next several quarters as the Federal Reserve is considering rate cuts.

Net interest margin decreased 2 basis points to 5.24% for the three months ended June 30, 2019 compared with the same period a year earlier. Acquisition accounting adjustments, including the accretion of loan discounts and amortization of certificate of deposits premium, added 7 basis points to the net interest margin for the three months ended June 30, 2019.

Net interest income increased \$1.7 million to \$54.6 million for the six months ended June 30, 2019 compared with \$52.9 million for the same period of 2018. The increase is primarily the result of average interest earning assets growing 2.7%, or \$55.5 million, and yields on interest earning assets increasing 14 basis points to 5.70% for the same comparable periods. Higher yields on interest earning assets were primarily the result of yields on loans increasing 24 basis points to 6.55% for the same comparable periods, offset by the percentage of loans to total interest earning assets declining to 80.3% for the second quarter of 2019 compared with 82.8% for the second quarter of 2018.

For the six months ended June 30, 2019, total cost of interest bearing liabilities increased 21 basis points to 0.74% compared with the same period a year ago, and is the result of the cost of interest bearing deposits increasing 34 basis points to 0.73% for the same comparable periods, while short-term borrowing declined \$109.6 million, or 95.7%, to \$4.9 million with the borrowing rate increasing 75 basis points to 2.63% for the six months ended June 30, 2019, compared with the same period a year earlier. The Company expects the increase in cost of interest bearing deposits to remain flat over the next several quarters as the Federal Reserve is considering rate cuts.

Net interest margin increased 2 basis points to 5.26% for the six months ended June 30, 2019 compared with the same period a year earlier. Acquisition accounting adjustments, including the accretion of loan discounts and amortization of certificate of deposits premium, added 9 basis points to the net interest margin for the six months ended June 30, 2019.

Net Income. Net income increased \$0.5 million to \$11.0 million for the three months ended June 30, 2019, compared with \$10.5 million for the three months ended June 30, 2018. This was primarily attributable to an increase in net interest income of \$0.7 million, and a decrease in non-interest expense of \$1.1 million, offset by an increase in provision for loan losses of \$0.7 million, a decrease in non-interest income of \$0.5 million, and an increase in income tax expense of \$0.2 million.

Net Interest Income and Net Interest Margin. The increase in net interest income for the three months ended June 30, 2019 compared with the same quarter in 2018 was primarily the result of average interest earning assets growing 3.1%, or \$64.8 million, and yields on interest earning assets increasing 8 basis points to 5.68% for the same comparable periods. Interest expense in the three months ended June 30, 2019 increased from the same period in 2018 due to an increase in average interest bearing deposits, combined with an increase in the cost of deposits of 34 basis points.

The yield on our average interest earning assets was 5.68% for the three months ended June 30, 2019 compared with 5.60% for the same period of 2018. The cost of total funding increased in the three months ended June 30, 2019 to 0.49% from 0.38% in the comparable quarter in 2018.

Provision for Loan Losses. The provision for loan losses in each period is a charge against earnings in that period. The provision is that amount required to maintain the allowance for loan losses at a level that, in management's judgment, is adequate to absorb loan losses inherent in the loan portfolio.

For the three months ended June 30, 2019, provision for loan losses was \$2.2 million compared with \$1.5 million for the same period a year earlier. The increase in provision for loan losses in the three months ended June 30, 2019 is due primarily to \$3.3 million in specific reserves, of which \$2.2 million represents reserves for the unguaranteed portion of four Government-guaranteed loans acquired in the Town & Country Bank acquisition. For the three months ended June 30, 2019, the Company incurred net charge-offs of \$34 thousand compared with net recoveries of \$0.1 million for the same period a year ago.

Non-interest Income. The following table presents, for the periods indicated, the major categories of non-interest income:

<i>(Dollars in thousands)</i>	Three Months Ended		\$ Better / (Worse)	% Better / (Worse)
	June 30, 2019	June 30, 2018		
Mortgage banking	\$ 1,621	\$ 1,505	\$ 116	7.7%
Card processing	814	799	15	1.9%

Net gain on sale of investment securities	-	333	(333)	-100.0%
Other	458	725	(267)	-36.8%
Total non-interest income	\$ 3,598	\$ 4,066	\$ (468)	-11.5%

For the three months ended June 30, 2019, noninterest income was \$3.6 million compared with \$4.1 million the same period a year ago. The decrease was primarily due to a one-time gain on sale of securities of \$0.3 million in the second quarter of 2018 and \$0.2 million loss on the disposal of assets in the second quarter of 2019, offset by an increase in mortgage banking income of \$0.1 million.

Non-interest Expense. The following table presents, for the periods indicated, the major categories of non-interest expense:

<i>(Dollars in thousands)</i>	Three Months Ended		\$ Better / (Worse)	% Better / (Worse)
	June 30, 2019	June 30, 2018		
Salaries and employee benefits	\$ 9,526	\$ 10,196	\$ 670	6.6%
Occupancy, equipment and depreciation	1,558	1,411	(147)	-10.4%

Other	2,223	2,532	309	12.2%
Total non-interest expense	\$ 14,699	\$ 15,823	\$ 1,124	7.1%

For the three months ended June 30, 2019, noninterest expense was \$14.7 million compared with \$15.8 million for the same period a year earlier and is primarily the result of \$0.7 million in lower salaries and employee benefits, \$0.3 million in lower other non-interest expense primarily related to lower legal expenses, \$0.2 million in lower FDIC premiums, and \$0.1 million in lower marketing costs. For the three months ended June 30, 2019, the Company's efficiency ratio was 46.93% compared with 50.97% for the same period a year ago.

Income Tax Expense. For the three months ended June 30, 2019, income tax expense was \$3.5 million compared with \$3.3 million for the same period a year earlier. For the three months ended June 30, 2019, the effective tax rate was 24.1% compared with 23.9% for the same period a year ago. The tax rate in the first quarter of 2019 is higher than the same quarter in 2018 due primarily to higher tax benefits related to tax-deductible stock compensation expense in 2018.

Financial Overview for the Six Months Ended June 30, 2019 and 2018

<i>(Dollars in thousands)</i>	Six Months Ended		\$ Better / (Worse)	% Better / (Worse)

Non-interest income	6,935	7,784	(849)	-10.9%
Non-interest expense	29,615	31,871	2,256	7.1%
Income before income tax expense	28,247	25,310	2,937	11.6%
Income tax expense	6,753	5,839	(914)	-15.7%
Net income	<u>\$ 21,494</u>	<u>\$ 19,471</u>	<u>\$ 2,023</u>	10.4%

Net Income. Net income increased \$2.0 million to \$21.5 million for the six months ended June 30, 2019, compared with \$19.5 million for the six months ended June 30, 2018. This was primarily attributable to an increase in net interest income of \$1.7 million, and a decrease in non-interest expense of \$2.3 million, offset by an increase in income tax expense of \$0.9 million, a decrease in non-interest income of \$0.8 million, and an increase in provision for loan losses of \$0.2 million.

Net Interest Income and Net Interest Margin. The increase in net interest income for the six months ended June 30, 2019 compared with the same quarter in 2018 was primarily the result of average interest earning assets growing 2.7%, or \$55.5 million, and yields on interest earning assets increasing 14 basis points to 5.70% for the same comparable periods. Interest expense in the six months ended June 30, 2019 increased from the same period in 2018 due to an increase in average interest bearing deposits, combined with an increase in the cost of deposits of 34 basis points.

The yield on our average interest earning assets was 5.70% for the six months ended June 30, 2019 compared with 5.56% for the same period of 2018. The cost of total funding increased in the six months ended June 30, 2019 to 0.49% from 0.35% in the comparable period in 2018.

Provision for Loan Losses. The provision for loan losses in each period is a charge against earnings in that period. The provision is that amount required to maintain the allowance for loan losses at a level that, in management's judgment, is adequate to absorb loan losses inherent in the loan portfolio.

For the six months ended June 30, 2019, provision for loan losses was \$3.7 million compared with \$3.5 million for the same period a year earlier. The increase in provision for loan losses in the three months ended June 30, 2019 is due primarily to \$3.3 million in specific reserves, of which \$2.2 million represents reserves for the unguaranteed portion of four Government-guaranteed loans acquired in the Town & Country Bank acquisition, offset by a reduction in construction loan concentrations. For the six months ended June 30, 2019, the Company incurred net charge-offs of \$0.9 million compared with net recoveries of \$0.5 million for the same period a year ago.

Non-interest Income. The following table presents, for the periods indicated, the major categories of non-interest income:

<i>(Dollars in thousands)</i>	Six Months Ended		\$ Better / (Worse)	% Better / (Worse)
	June 30, 2019	June 30, 2018		
Mortgage banking	\$ 3,038	\$ 3,143	\$ (105)	-3.3%

Total non-interest income	<u>\$ 6,935</u>	<u>\$ 7,784</u>	<u>\$ (849)</u>	-10.9%

For the six months ended June 30, 2019, noninterest income was \$6.9 million compared with \$7.8 million the same period a year ago. The decrease was primarily due to a one-time gain on sale of securities of \$0.3 million in the six months ended June 30, 2018, a decrease of \$0.3 million in other non-interest income, a decrease in mortgage banking income of \$0.1 million and a decrease in card processing income of \$0.1 million.

Non-interest Expense. The following table presents, for the periods indicated, the major categories of non-interest expense:

<i>(Dollars in thousands)</i>	Six Months Ended		\$ Better / (Worse)	% Better / (Worse)
	June 30, 2019	June 30, 2018

Total non-interest expense	<u>\$ 29,615</u>	<u>\$ 31,871</u>	<u>\$ 2,256</u>	7.1%

For the six months ended June 30, 2019, noninterest expense was \$29.6 million compared with \$31.9 million for the same period a year earlier and is primarily the result of \$1.2 million in lower salaries and employee benefits, \$0.4 million in lower marketing and advertising costs, \$0.4 million in lower FDIC premiums, and \$0.4 million in acquisition-related costs attributed to 2018. For the six months ended June 30, 2019, the Company's efficiency ratio was 48.11% compared with 52.50% for the same period a year ago.

Income Tax Expense. For the six months ended June 30, 2019, income tax expense was \$6.8 million compared with \$5.8 million for the same period a year earlier. For the six months ended June 30, 2019, the effective tax rate was 23.9% compared with 23.1% for the same period a year ago. The tax rate for the six months ended June 30, 2019 is higher than the same period in 2018 due primarily to higher tax benefits related to tax-deductible stock compensation expense in 2018.

Financial Condition

Total assets were \$2.31 billion at June 30, 2019, a 5.8% increase compared with December 31, 2018. Total loans held for investment were \$1.67 billion at June 30, 2019, a slight decrease of 0.4% from December 31, 2018. Total deposits were \$1.98 billion at June 30, 2019, an increase of 5.6% compared with December 31, 2018.

We originate certain residential mortgage loans for sale to investors that are carried at cost. Due to the short period held, generally less than 90 days, we consider the carrying value of these loans held for sale to be the approximate fair value.

The following table shows the amounts of outstanding loans, which, based on remaining scheduled repayments of principal, were due in one year or less, more than one year through five years, and more than five years. Lines of credit or other loans having no stated maturity and no stated schedule of repayments are reported as due in one year or less. In the table below, loans are classified as real estate related if they are collateralized by real estate. The tables also present, for loans with maturities over one year, an analysis with respect to fixed interest rate loans and adjustable interest rate loans.

Contractual maturities at June 30, 2019 were as follows:

(Dollars in thousands)	Maturity			Total	Rate Structure for Loans Maturing Over One Year	
	One Year or Less	One through Five Years	After Five Years		Fixed Rate	Adjustable Rate

⁽¹⁾ The sum of adjustable rate loans maturing after one year and total loans maturing within one year is \$1.5 billion or 87.1% of total gross loans held for investment at June 30, 2019.

Concentrations. As of June 30, 2019, in management's judgment, a concentration of loans existed in real estate related loans. At that date, real estate related loans comprised 81.9% of total loans held for investment, of which 54.4% are real estate term loans, 18.3% are construction and land development loans, and 9.2% are residential and home equity loans. We require collateral on real estate lending arrangements and typically maintain loan-to-value ratios of up to 80%, except for some residential construction loans of up to 95% loan-to-value provided the loan includes pre-approved long-term financing. Our concentration in commercial and industrial loans has decreased to 17.2% at June 30, 2019 from 17.6% at December 31, 2018.

Non-Performing Assets. Loans are placed on non-accrual status when they become 90 days or more past due or at such earlier time as management determines timely recognition of interest to be in doubt. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions, collection efforts, and the borrower's financial condition, that the borrower will be unable to make payments as they become due. When interest accrual is discontinued, all unpaid accrued interest is reversed. Interest income is subsequently recognized only to the extent cash payments are received, or payment is considered certain. Loans may be returned to accrual status when all delinquent interest and principal amounts contractually due are brought current and future payments are reasonably assured.

The following non-performing assets table, excluding PCI loans, summarizes the loans for which the accrual of interest has been discontinued and loans more than 90 days past due and still accruing interest, including those non-accrual loans that are troubled-debt restructured loans, and OREO:

(1) We estimate that approximately \$117,000 and \$256,000 of interest income would have been recognized on loans accounted for on a non-accrual basis for the six months ended June 30, 2019 and the year ended December 31, 2018, respectively, had such loans performed pursuant to contractual terms.

(2) Non-performing assets as of June 30, 2019 and December 31, 2018 have not been reduced by U.S. government guarantees of \$117,000 and \$406,000, respectively.

As of June 30, 2019 and December 31, 2018, there are \$1.7 million and \$2.2 million, respectively, in PCI loans that are not performing to the original contractual terms. Including these PCI loans, total non-accrual loans are \$5.0 million and \$4.5 million at June 30, 2019, and December 31, 2018, respectively.

Impaired Loans. Impaired loans are loans for which it is probable that we will be unable to collect all principal and interest payments due according to the contractual terms of the loan agreement. We measure impairment based on the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's observable market price, or the fair value of the collateral, if the loan is collateral-dependent.

In determining whether or not a loan is impaired, we consider payment status, collateral value and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. We determine the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all the circumstances surrounding the loan and borrower, including the length of delay, the reasons for the delay, the borrower's prior payment record and the amount of the shortfall in relation to the principal and interest owed. Loans for which an insignificant shortfall in amount of payments is anticipated, but where we expect to collect all amounts due, are not considered impaired.

Troubled-debt Restructured Loans. A restructured loan is considered a troubled debt restructured loan, or TDR, if we, for economic or legal reasons related to the debtor's financial difficulties, grant a concession in terms or a below-market interest rate to the debtor that we would not otherwise consider. TDR loans were \$20.8 million and \$7.5 million at June 30, 2019 and December 31, 2018, respectively. Our TDR loans are considered impaired loans of which \$1.5 million and \$1.6 million were designated as non-accrual at June 30, 2019, and December 31, 2018, respectively.

Each restructured debt is separately negotiated with the borrower and includes terms and conditions that reflect the borrower's prospective ability to service the debt as modified.

OREO Properties. OREO represents real property taken either through foreclosure or through a deed in lieu thereof from the borrower. All OREO properties are recorded by us at amounts equal to or less than the fair market value of the properties based on current independent appraisals reduced by estimated selling costs. The following table provides a summary of the changes in the OREO balance:

Allowance for Loan Losses

We maintain an adequate allowance for loan losses, or ALLL, based on a comprehensive methodology that assesses the losses inherent in the loan portfolio. Our ALLL is based on a continuing review of loans which includes consideration of actual loss experience, changes in the size and character of the portfolio, identification of individual problem situations which may affect the borrower's ability to repay, evaluations of the prevailing and anticipated economic conditions, and other qualitative factors. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revision as more information becomes available.

Our ALLL is increased by charges to income and decreased by charge-offs (net of recoveries). While we use available information to recognize losses on loans, changes in economic conditions may necessitate revision of the estimate in future years.

The ALLL consists of specific and general components. The specific component relates to loans determined to be impaired that are individually evaluated for impairment. For impaired loans individually evaluated, an allowance is established when the discounted cash flows, or the fair value of the collateral, if the loans are collateral-dependent, of the impaired loans are lower than the carrying value of the loan. The general component covers all loans not individually evaluated for impairment and is based on historical loss experience adjusted for qualitative factors. Various qualitative factors are considered including changes to underwriting policies, loan concentrations, volume and mix of loans, size and complexity of individual credits, locations of credits and new market areas, changes in local and national economic conditions, and trends in past due, non-accrual and classified loan balances.

The following table sets forth the activity in our allowance for loan losses for the periods indicated:

Allowance for loan losses to loans held for investment	1.68%	1.32%	1.68%	1.32%

The allowance for loan losses to loans held for investment was 1.68% at June 30, 2019 compared with 1.32% at June 30, 2018. In accordance with acquisition accounting, loans acquired from the Utah branches of Banner Bank and from Town & Country Bank were recorded at their estimated fair value, which resulted in a net discount to the loans' contractual amounts, a portion of which reflects a discount for possible credit losses. Credit discounts are included in the determination of fair value, and as a result, no allowance for loan and lease losses is recorded for acquired loans at the acquisition date. The discount recorded on the acquired loans is not reflected in the allowance for loan losses or related allowance coverage ratios. Remaining credit discounts on acquired loans were \$6.7 million at June 30, 2019. The allowance for loan losses is also adjusted based on changes to the underlying loan portfolio, changes to our historical loss rates, and adjustments to qualitative ALLL factors due to changes in current conditions.

Our construction and land development portfolio reflects borrower concentration risk, and also carries the enhanced risks encountered with construction loans generally. Construction and land development loans are generally more risky than permanent mortgage loans because they are dependent upon the borrower's ability to generate cash to service the loan, and the value of the collateral depends on project completion when market conditions may have changed. Our commercial real estate loans are a mixture of new and seasoned properties, retail, office, warehouse, and some industrial properties. Loans on properties are usually underwritten at a loan to value ratio of up to 75% with a minimum debt coverage ratio of 1.25 times.

We allocate our allowance for loan losses by assigning general percentages to our major loan categories (construction and land development, commercial real estate term, residential real estate, C&I and consumer), assigning specific percentages to each category of loans graded in accordance with the guidelines established by our regulatory agencies, and making specific allocations to impaired loans when factors are present requiring a greater reserve than would be required using the assigned risk rating allocation, which is typically based on a review of appraisals or other collateral analysis.

The following table indicates management's allocation of the ALLL in each category to total loans as of each of the following dates:

Investments

Investment securities were \$334.8 million at June 30, 2019 and \$346.4 million at December 31, 2018. As of June 30, 2019, our portfolio of investment securities is comprised of available for sale securities. During the six months ended June 30, 2019, we transferred the held to maturity securities to available for sale. At June 30, 2019, we held no investment securities from any issuer which totaled over 10% of our shareholders' equity.

The carrying value of our portfolio of investment securities was as follows:

(Dollars in thousands)	June 30, 2019	December 31, 2018

Actual maturities may differ from contractual maturities because issuers may have the right to call obligations with or without penalties.

We evaluate securities for other-than-temporary impairment at least on an annual basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) our intent and ability to retain our investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Deposits

Total deposits were \$1.98 billion at June 30, 2019 and \$1.88 billion at December 31, 2018. The increase in total deposits is attributed primarily to organic growth as a result of enhanced deposit pricing. Non-interest bearing demand deposits were \$707.1 million, or 35.7% of total deposits at June 30, 2019 compared with \$642.6 million, or 34.2% of total deposits at December 31, 2018. Interest bearing deposits are comprised of interest bearing DDA accounts, money market accounts, regular savings accounts, certificates of deposit of \$250,000 or less, and certificates of deposit of more than \$250,000.

The following table shows the average amount and average rate paid on the categories of deposits for each of the periods presented:

(Dollars in thousands)	Six months ended June 30, 2019		Six months ended June 30, 2018	
	Average Balance	Average Rate	Average Balance	Average Rate

Due in over three months through six months	3,726
Due in over six months through twelve months	10,972
Due in over twelve months	25,831
Total	<u>\$ 40,529</u>

Deposits are gathered from individuals, partnerships and corporations in our market areas. The interest rates paid are competitively priced for each particular deposit product and structured to meet our funding requirements. We will continue to manage interest expense through deposit pricing.

Shareholders' Equity

Shareholders' equity totaled \$312.8 million at June 30, 2019, an increase of \$22.6 million or 7.8% since December 31, 2018. The increase in shareholders' equity for the six months ended June 30, 2019 was primarily due to an increase of \$1.0 million in additional paid in capital from exercises of stock options, share-based compensation, and net income of \$21.5 million for the period less dividends paid of \$4.3 million.

Dividends of \$0.23 per share were declared during the six months ended June 30, 2019 representing 20.1% of the net income for the same period. We announced a quarterly dividend of \$0.13 per share on July 25, 2019, payable on August 12, 2019 for shareholders' of record on August 5, 2019. Future cash dividends will depend on a variety of factors, including net income, capital, asset quality, general economic conditions, and regulatory considerations.

Capital Resources

We are subject to risk-based capital adequacy guidelines related to the adoption of U.S. Basel III Capital Rules. Specifically, the rules impose, among other requirements, new minimum capital requirements including a Tier 1 leverage capital ratio of 4.0%, a common equity Tier 1 risk-based capital ratio of 4.5%, a Tier 1 risk-based capital ratio of 6% and a total risk-based capital ratio of 8%.

The following table sets forth our capital ratios:

	Basel III Regulatory Requirements - Well Capitalized (Greater than or Equal to Stated Percentage)	PUB		
		Actual as of June 30, 2019	Actual as of December 31, 2018	Actual as of June 30, 2018
Common equity tier 1 capital	6.50%	15.99%	15.11%	13.97%
Tier 1 risk-based capital	8.00%	15.99%	15.11%	13.97%
Total risk-based capital	10.00%	17.24%	16.36%	15.22%
Tier 1 leverage capital ratio	5.00%	12.78%	12.27%	11.48%

PUB and PIB met the requirements to be defined as a "well-capitalized" institution at June 30, 2019, December 31, 2018 and June 30, 2018 for federal regulatory purposes.

Off-Balance Sheet Arrangements

Liquidity

The ability to have readily available funds sufficient to repay fully maturing liabilities is of primary importance to depositors, creditors and regulators. Our liquidity, represented by cash borrowing lines, federal funds and available for sale securities, is a result of our operating, investing and financing activities and related cash flows. In order to ensure funds are available at all times, we devote resources to projecting, on a monthly basis, the amount of funds that will be required and we maintain relationships with a diversified customer base so funds are accessible. Liquidity requirements can also be met through short-term borrowings or the disposition of short-term assets. We have borrowing lines at a correspondent bank totaling \$25.0 million. We also have a current borrowing line with the FHLB, totaling \$683.9 million at June 30, 2019, which is secured by various real estate loans pledged as collateral totaling \$707.9 million and investment securities of \$216.1 million. Additionally, we have a borrowing line with the Federal Reserve Bank of \$28.2 million, which is secured by \$28.5 million of investment securities.

We believe our liquid assets are adequate to meet our cash flow needs for loan funding and deposit cash withdrawal for the next 60 to 90 days. At June 30, 2019, we had approximately \$283.3 million in net liquid assets comprised of \$192.5 million in cash and cash equivalents, including interest bearing deposits of \$64.1 million and federal funds sold of \$90.3 million, \$334.8 million in available for sale investment securities and \$18.4 million in loans held for sale, less \$262.4 million of available for sale securities pledged as collateral for short-term borrowings.

On a long-term basis, our liquidity will be met by changing the relative distribution of our asset portfolios by reducing our investment or loan volumes, or selling or encumbering assets. Further, we will increase liquidity by soliciting higher levels of deposit accounts through promotional activities and/or borrowing from our correspondent banks, as well as the FHLB. At the current time, our long-term liquidity needs primarily relate to funds required to support loan originations and commitments, deposit withdrawals and pending acquisitions. All of these needs can currently be met by cash flows from investment payments and maturities, and investment sales if the need arises.

Our liquidity is comprised of three primary classifications: cash flows from or used in operating activities; cash flows from or used in investing activities; and cash flows from or used in financing activities.

Net cash provided by or used in operating activities has consisted primarily of net income adjusted for certain non-cash income and expense items such as the loan loss provision, depreciation and amortization, amortization of investment discount and premiums, share based compensation, changes in the value of bank owned life insurance and other gains and losses.

Our primary investing activities are the origination of real estate, commercial and consumer loans and purchases and sales of investment securities. At June 30, 2019, we had outstanding loan commitments of \$572.9 million, credit card commitments of \$25.4 million and outstanding letters of credit of \$26.5 million. We anticipate that we will have sufficient funds available to meet current loan commitments.

Net cash provided by financing activities for the six months ended June 30, 2019 was \$101.1 million, principally from an increase in deposit balances, offset by dividends paid to shareholders during the period.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company's assessment of market risk at June 30, 2019 indicates there have been no material changes in the quantitative and qualitative disclosures from those in our Annual Report on Form 10-K for the year ended December 31, 2018 filed with the SEC.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer have reviewed and evaluated the effectiveness of the Company's disclosure controls and procedures (as required by Exchange Act Rules 240.13a-15(b) and 15d-14(a)) at June 30, 2019. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that the Company's current disclosure controls and procedures are effective and timely, providing them with material information relating to the Company required to be disclosed in the reports the Company files or submits under the Exchange Act.

Changes in Internal Controls

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended June 30, 2019, to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

The Company is involved in various claims, legal actions and complaints which arise in the ordinary course of business. In the Company's opinion, all such matters are adequately covered by insurance, are without merit or are of such kind, or involve such amounts, that unfavorable disposition would not have a material adverse effect on the financial condition or results of operations of the Company.

Item 1A. Risk Factors

There have been no material changes in our assessment of our risk factors from those set forth in our Annual Report on Form 10-K for the year ended December 31, 2018.
